PROFESSIONAL SUMMARY

I am a passionate and driven junior software engineer with a solid technical foundation and a strong interest in solving real-world problems through code. My experience includes full-stack web development, systems programming, and scripting automation. I am highly self-motivated, adaptable, and dedicated to writing clean, efficient, and maintainable code.

I have worked on a variety of personal and collaborative software projects and am now seeking a junior software engineering position where I can continue learning, contribute to real-world products, and grow within a professional team.

TECHNICAL SKILLS

Languages: Python, C++, C#, JavaScript, Arduino C++, SQL, Bash

Frameworks & Libraries: Flask, Django, React, Node.js, Vue.js, Qt5

Databases: MySQL, SQLite, MongoDB

Tools & Systems: Git, Docker, Linux, Visual Studio Code

Core Concepts: Object-Oriented Programming, REST APIs, multithreading, version control, real-time systems

PROJECT EXPERIENCE

Windows Kernel Driver (C)

- Designed and developed a low-level Windows kernel driver with secure memory access and performance optimizations.
- Gained experience in system-level programming, driver signing, and hardware abstraction.

Automation and Scripting (Python)

- Built a suite of automation scripts to reduce manual workflows and improve consistency.
- Used SQLite and MongoDB for lightweight local data storage and efficient querying.

Full-Stack Web Applications (Flask, Django, React)

- Developed full-stack web applications with clean user interfaces and robust back-end logic.
- Implemented RESTful APIs, user authentication, and responsive UI designs.

Collaborative Projects

- Contributed to various team-based software builds, participating in code reviews, planning, and testing.

- Regularly used Git and GitHub for version control and collaborative development.
-

WORK EXPERIENCE

Customer Team Member

Co-op · June 2024 – Present

- Delivered customer service with professionalism and technical support for in-store devices.
- Maintained operational efficiency through teamwork, product handling, and store upkeep.

Warehouse Operative

Tesco Distribution Centre · June – August 2024

- Worked in a fast-paced logistics environment, accurately processing high-volume orders.
- Supported stock control processes and met strict operational deadlines.

Electrical Engineer (Internship)

Uniper · April – August 2023

- Diagnosed technical issues in a power generation setting and supported maintenance efforts.
 - Coordinated with contractors and led daily operational briefings.
 - Ensured compliance with regulatory and safety standards.
-

EDUCATION

Extended Diploma in Engineering

Waterfront UTC, Kent · Completed May 2023

- Focus: Mechanical, Electrical, and Software Engineering
- Built embedded systems using Arduino and Python.
- Designed and programmed custom PCBs for integrated engineering solutions.

GCSEs

Waterfront UTC, Kent · Completed July 2021

- Achieved strong academic performance, including Level 9 in Business.
-

CERTIFICATIONS AND LEARNING

- Google UX Design Professional Certificate (in progress)
 - Amazon Junior Software Developer Certificate (in progress)
 - Committed to self-learning through open-source contributions and technical deep-dives
-

INTERESTS

- Strong personal interest in system optimisation, software architecture, and improving user experience through thoughtful design.
 - Dedicated to fitness and powerlifting, applying the same consistency, discipline, and focus to my technical work.
-

AVAILABILITY

Available for full-time junior software engineering roles. Open to hybrid or remote working arrangements.
